NHS Scoring Guidance

Recent guidance issued by NHS England has confirmed the move away from the 'Net Promoter' scoring methodology to a simpler 'Percentage Recommended' and 'Percentage Not Recommended' method.

The percentage measures are calculated as follows:

Recommended (%) =
$$\frac{\text{very good} + \text{good}}{\text{very good} + \text{good} + \text{neither} + \text{poor} + \text{very poor} + \text{don't know}} \times 100$$

Not Recommended (%) =
$$\frac{\text{very poor} + \text{poor}}{\text{very good} + \text{good} + \text{neither} + \text{poor} + \text{very poor} + \text{don't know}} \times 100$$

For further information about the selection of the scoring method please see the NHS FFT Review published in June 2014 here:

- ✓ *Seeing the Nurse and the ECG was very good but then I had to wait almost an hour, in the waiting room with lots of people with colds, coughs etc and after asking at reception, twice, I then got the 'sign off' to go home. I fully understand that this is a busy time for the Health centre and therefore wonder if it would be better for the Doctor to sign it off but if there are any problems to get in touch? I was actually singing the Centres praises to the Nurse at my appointment.*
